

GOORTANI PROFILE

TOGAF • PMP

APRIL 2026

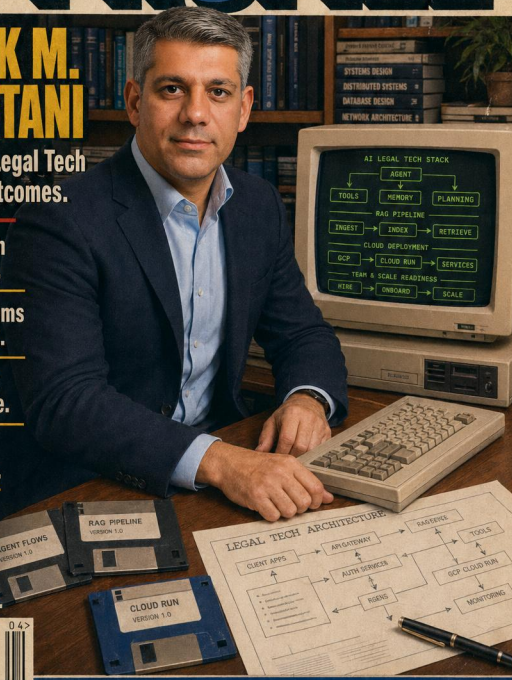

FRANK M. GOORTANI

Scaling AI Legal Tech
at FasterOutcomes.

- Production AI Agents.
- RAG Systems That Work.
- Cloud Run in Practice.
- CTO Execution.
- Team Scaling.
- Series A Readiness.

FasterOutcomes CTO

HOW TO SCALE AN AI LEGAL TECH STACK.

Frank M. Goortani on production agents, retrieval, cloud delivery, and engineering hiring.

At the terminal: RAG, tools, memory, and scale readiness.

1. Ship.

Get from idea to production with a reliable agent stack. LangGraph for orchestration, tools for action, memory for context, and RAG for accurate answers. Interfaces that lawyers trust and operations can depend on.

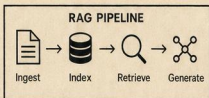

2. Secure.

Security isn't optional. OAuth-secured tools, least privilege, audit logs, data protection, and compliance by design. Build systems that earn enterprise confidence.

3. Scale.

From pilot to platform. Cloud Run for elasticity, observability for insight, and engineering process for repeatable delivery. Hire great people and let them build.

“The demo is only the beginning.”

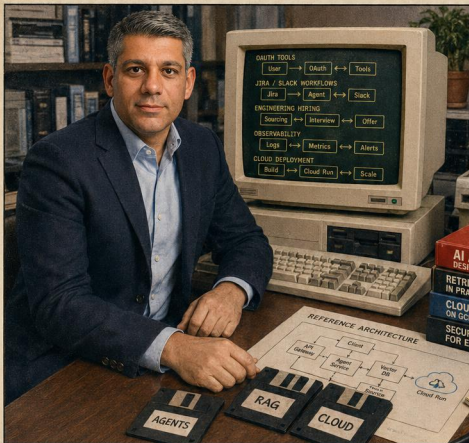

CTO SYSTEMS

- Python.
- FastAPI.
- LangGraph.
- Firebase.
- Pinecone.
- GCP Cloud Run.

FROM MVP TO SERIES A, THE STACK HAS TO HOLD.

A practical CTO note on tools, teams, security, and scale.

CURRENT FOCUS

- FasterOutcomes CTO.
- Engineering hiring.
- Revenue features.
- 10x infrastructure.
- Series A readiness.

Tools.

The right tools multiply your leverage. LangChain for components. LangGraph for orchestration. FastAPI for speed. Pinecone for vectors. OAuth for trust. Build composable systems you can actually operate.

Simplicity in, power out—that's how you ship.

Team.

Great products come from great teams. Hire for judgment, curiosity, and ownership. Define crisp outcomes. Remove blockers. Ship, learn, and iterate—together. Culture scales what strategy starts.

Hire builders. Give clarity. Get out of the way.

Scale.

Production is a different game. Design for reliability, security, and cost from day one. Automate the boring. Observe everything. Scale with confidence, not hope.

Your architecture is your growth strategy.

BEFORE YOU GO LIVE.

- Secure auth.
- Audit logs.
- Retrieval tests.
- Human review.

Yes! Send me the CTO Toolkit.

- Architecture templates
- Hiring playbook
- Security checklist
- RAG evaluation guide
